

RETRACTABLE SHADING SOLUTIONS

SunStopper
SHADE SYSTEMS

Beautiful shading for any budget.

SunStopper Shade Systems offers you two models of custom made, on-demand retractable awnings. Convert your deck or patio space into your outdoor living room at the touch of a button. Your uniquely crafted SunStopper retractable awning will add charm, style and function to your home while protecting family and guests from the harmful effects of the sun.

The Shadow PLUS

New and Improved

The enhanced Shadow Plus model now offers an even greater degree of customization. Create a retractable awning for your home that is assembled here in the USA and will fit your unique shading needs. The Shadow's European and domestic sourced components allow us to construct a both rugged, but beautiful product that is designed to last. The Shadow PLUS is available like the Silhouette PLUS in a variety of long lasting, first quality Sunbrella® 100% acrylic fabrics. Don't be confused by low end imported units found in retail stores or on-line! The Shadow PLUS can be mounted on virtually any surface and is available up to 32' wide with 3 projection options up to 11'6".

Both SunStopper models come standard with an internal tubular motor that is operated with a handheld transmitter. The motor also features a built-in override feature that allows you to operate the awning in the event of a power failure. SunStopper awnings also come standard with an 18' long plug-in cord, eliminating the need for an electrician!

The Silhouette PLUS

An Added Level of Customization

The new and improved Silhouette Plus offers more customization than ever before to optimize performance while enhancing your home decor. You select from the full line of 100% acrylic fabrics available from Sunbrella's Shade collection. These industry leading fabrics carry a full 10 year warranty protecting your awning from rot, mildew or excessive fading. To prevent the seams from failing, we use Tenara thread by Gore. In using this superior thread, the seams are warranted for as long as the fabric.

The Silhouette PLUS, is available up to 40 feet wide with five projections ranging up to 11'6" feet. The arms feature Advanced Ribbon Technology which is only found in the industry on high end retractable awning models! The arm's internal cold wound, high carbon springs exert almost 900 lbs. of outward force in each arm to provide you a superior looking awning that is designed to last. The Silhouette Plus is also available with a semi cassette option which is ideal for roof mount applications. The semi Cassette option is offered up to 22' wide while the standard protective hood is available on models up to 40' wide.

THE PROTECTIVE ALUMINUM HOOD

The optional aluminum, powder-coated SunStopper Protective Hood is available on both models. The Protective Hood matches the frame color and will greatly reduce the elements from affecting your investment when retracted. The Protective Hood is highly recommended for all roof mounting and fascia (wall) mounting applications when no direct overhead protection exists.

SEMI CASSETTE HOOD

This protective, aluminum powder-coated Semi Cassette Hood wraps around the unit's fabric to provide complete protection from the elements when retracted. This option is only available on the Silhouette PLUS model up to 22'0" wide. The Semi Cassette Hood is ideal for roof mount applications.

WIDE SELECTION OF COLORS & STYLES BY sunbrella™

We offer the industry-leading Sunbrella acrylic shade fabrics which are warranted from rot, mildew and excessive fading for 10 years. These easy to clean long lasting fabric will also provide up to 98% UV protection from the sun, allowing you to enjoy the outdoors in safety.

PROFESSIONAL INSTALLATION

To provide safe and effective solar protection, proper installation is required. Your SunStopper dealer will design and install a shading system that fits both your budget and needs. Proper installation will provide years of worry-free on demand shading.
